PROCUREMENT OF CARDIAC IMPLANTS &amp; OTHER MISCELLANEOUS ITEMS ON FRAMEWORK CONTRACT BASIS (AS PER SPRA RULE 15(B))

S. No	Item Description	TENTATIVE QTY	UOM	Name of Company	Description / Make	Country of Origin	DRAP #	Unit Price	Total Price	Ranking	End User Comment	Successful Bidder
10	Level Sensor	100	Pcs	NOT QUOTED								
11	ACT Cartridge with placement of machine of FOC basis	300	Pcs	M/s. MEDTRONIC	The HRTIC performs an activated clotting time test in which channel 1, labeled HRTIC, contains purified flavobacterial heparinase. The heparinase rapidly and specially inactivates heparin in the sample (up to 6u/ml), therefore, the blood in channel 1 clots in a time representative of an unheparinized blood sample. Channel 2 contains no heparinase and therefore represents a standard High Range Activated Clotting Time (HRACT). Thus, any heparin in the sample will extend the clotting time. Comparing the difference between the clotting times of channel 2 and channel 1 reflects the clotting time extension due to heparin.	USA	MDR-0000157	1,000	300,000	1st Lowest	Approved	M/s. MEDTRONIC
