 - 3 months in General Surgery
 - 3 months in Orthopedic surgery
 - 3 months in General Medicine with one month in MICU
 - 3 months in Nephrology
- DUTIES AND RESPONSIBILITIES:
 - I Assisted in minor surgical procedures under the supervision of the senior surgeons.
 - I Observation of major surgical procedures.
 - I Rotated through orthopedic ward, clinics, and A&E bay assisted in treating fractures and performing emergency procedures like back slabs and suturing minor laceration.

- Worked in emergency department during general medicine and general surgery rotation and carried out procedure like cannulation, blood gases, nasogastric tubing and cathetrization. Managed patients acutely and admit them in wards.
- I In general medicine ward, I attended to both ward and OPD duties along with on-duty in A&E, assisting in managing conditions such as DKA, hypertension, diabetes, and infections.
- Diagnosed and managed a diverse range of kidney-related disorders, including chronic kidney disease (CKD), acute kidney injury (AKI), and electrolyte imbalance.

RESEARCH

Participated in the Pubmed published project titled "Bibliometric Analysis of Publication Activity in the Field of Giant Cell Arteritis: A SCOPUS-based Study" (February 2022) aimed to identify the most significant contributors and assess the quality of their contributions in the field. The study analyzed research patterns to aid future studies, identify leading experts, address knowledge gaps, and inform funding decisions.
