### ABOUT ME

I like to describe myself as a person who is a good learner and brings the positive changes, I work hard and flexible in my working hours. I am working as In-charge Medical officer in Primary health care, I always believe in finishing work in time and I do not want to waste my patients time and I always want to diagnose the disease and try to get feedback of my patients.

I try to be innovative because in this digitalized world we still use paper work for patients record and prescription of medicine. I am interested in new digitalized world of Medicine. I satisfy myself by healing people and removing their diseases by treatment. I think it's the best thing for myself to give this world.

My goal in life is to become a pediatrician and researcher. By treating children we can cure the world's next generations and by research we can learn and find different treatment medications of cancer in children.
